

Environmental Policy

Environmental Policy

Zentec recognises our responsibilities and has produced an environmental policy which is designed to reflect the environmental impact on the activities, products and services we provide.

The object of this policy statement is to provide a framework around which we can promote our commitment to Zentec's environmental responsibilities. In order to continue, improve and promote good environmental practices we have highlighted several steps that Zentec will adhere to and where reasonably possible will ensure our environmental responsibilities are met.

Included in those objectives we list:

- ▶ Use of environmentally friendly equipment
- ▶ Observe and comply with relevant environmental legislation and approved codes of practice.
- ▶ Provide training, instruction and information to employees and subcontractors to ensure our workforce can contribute to our environment commitments.
- ▶ Recycle and reduce waste material where possible
- ▶ Liaise and co-operate with our suppliers and clients to promote good environmental practices
- ▶ Communicate environmental issues with all our employees
- ▶ Encourage employees to bring environmental issues to the attention of management and/or colleagues
